8.	<b>Polarimeter</b> The instrument is housed in a rugged chemical resistant case making it suitable for use in factory environments as well as in the laboratory. Operation is very simple by way of four graphically identified push buttons including scale and compensation selection, zero calibration and the displaying of optical density and temperature. Results are shown on a bright LED display and may be printed via an RS232 interface. Temperature compensation can be achieved from a single sensor, which can measure either the temperature Within the sample chamber or, when placed in the centre-filling arm of the measurement tube, the temperature of the actual sample. The sample reading value and optical density are alternately displayed by repeatedly pressing the READ key. An LED and narrow band interference filter provides illumination of the sample and requires no maintenance.
